

Certificate of Analysis

Product name: CERTIFIED STANDARD CUVETTES
Phosphorus High Range
Product code: HI706-11
Lot number: SC0759/21
Best used before: March 2023
Issuing date: 2021.09.01

Standard Cuvettes Specifications @ 25°C:

Standard cuvette code	Lot number	Standard value [ppm]	Analysis Results
HI706-11A	6529	0.0 - 0.2	Passed
HI706-11B	6530	7.5 ± 0.5	Passed

Hanna Instruments certifies these standards meet the stated tolerance limits as indicated. These should be used for quality control to validate instrument function on the specified Hanna instrument only. Store standards in the storage box upright at room temperature. Do not open HI706-11A standard cuvette.

Instructions for use:

1. Thoroughly wipe standard cuvette with HI731318 lint free cloth and only handle using top of cuvette. The cuvette wall must be dry and free of smudges.
2. Open HI706-11B standard cuvette and add specific reagents mentioned in procedure from the instruction manual of the meter (including timing).
3. At the C.1 prompt place HI706-11A standard cuvette into the holder of the Checker and press operations button.
4. At the C.2 prompt place HI706-11B standard cuvette prepared as on pct. 2. into the holder and press the operations button.

Acceptable results must be between 7.0 ppm and 8.0 ppm @ 25 °C.

Attention: HI706-11B standard cuvette can be used only once!
